The night sky is one of the most awe inspiring sights that we have the privilege of witnessing. We've been photographing the night sky since moving out to California from rainy England in 2012. The skies literally opened up with possibilities now that we could count on good weather most of the time, but learning how to photograph the night sky could be challenging and confusing. We've traveled all around California, Nevada, Utah and Arizona, going through many nights of trial and error to pinpoint the best and easiest steps to get great results and we are going to share them with you in this course. Who this course is for: Photographers who are fascinated by the night sky. Photographers who are looking to try something new. Course content. Expand all 45 lectures 03:55:46.
