Family Interaction: A Multigenerational Developmental Perspective

Stephen A Anderson Ronald Michael Sabatelli

Family Systems: Families are systems that have created their own strategies on how they deal with tasks on a daily bases. Processing, and developmental dimensions approaches to the analysis of age/development/life course trends. Developmental psychology, as a discipline, is currently undergoing a paradigmatic/world view change. Consequently, several different theoretical approaches to the study of development and the life course have been proposed and advocated. Family interaction by Stephen A. Anderson, 2002, Allyn and Bacon edition, in English - 3rd ed. A multigenerational development perspective. 3rd ed. by Stephen A. Anderson. Published 2002 by Allyn and Bacon in Boston. Written in English.
