Community health and preventive medicine focus on determining how to prevent diseases. A community is a group of people who might have different characteristics but share geographical location, settings, goals, or social interest. Examples of communities include people living in the same town, members of a church, or members of a sports team. Promoting human health and reducing health risks through disease prevention, education and other public health services are the major goals of Preventive Medicine and Community Health. It does not focus on a group of people with the same shared characteristics, like age or analysis, but on all people within a geographical location or involved in the specific activity.

INTRODUCTION. Community medicine: It is a specialty of medicine concerned with disease prevention and health promotion among individuals, families, and communities. There is lot of confusion about DEFINITION, SCOPE, & CONTENTS OF PUBLIC HEALTH, PREVENTIVE MEDICINE, PREVENTIVE & SOCIAL MEDICINE & COMMUNITY MEDICINE. Chronologically these terms present a WORD PICTURE OF the delivery of primary health care throughout the life cycle of human beings (i.e., from child hood to old age). It demands not only study of general medicine covering all. MD (Social and Preventive Medicine)-Three years. The field of social medicine seeks to implement social care through understanding how social and economic conditions impact health, disease and the practice of medicine and fostering conditions in which this understanding can lead to a healthier society. Social medicine as a scientific field gradually began in the early 19th century, the Industrial Revolution and the subsequent increase in poverty and disease among workers raised concerns about the effect of social processes on the health of the
