Open Cut: The Working Class In An Australian Mining Town

Claire Williams

Remote mining, resource and construction workers are susceptible to a wide three open cut mining sites across Western Australia and South Australia, were similar to those of the general Australian community. Trapped by a mining town mortgage after the boom - ABC News. Golden Mile in Western Australia, Australia’s largest open-pit mine. Adults employed in the mining industry as a percentage of the adult population in Australia divided geographically by statistical local area, as of the 2011 census. Mining in Australia is a significant primary industry and contributor to the Australian economy. Many mines in remote areas have a traditional company town for example. Book - Open Cut: The Working Class in an Australian Mining Town. Open cut: the working class in an Australian mining town. Bookmark No paradise for workers: capitalism and the common people in Australia, 1788-1914. Reimagining Class in Australia: Marxism, Populism and Social Science - Google Books Result 10 Apr 2017. In the current property market across Australia’s mining towns it is Because rental prices are lower, more people can afford to move up there.
METS firms are uniquely Australian with a long history, emerging due to a need to support miners to explore, mine and refine ore extracted from our unique environment, the first being established in 1859 (Austmine 2013). There are varying definitions identifying firms as METS but for the purposes of this report we are using the Department of Industry and Science's definition of METS firms as those that provide technology and services to the operating miners and whose primary source of income is from the miners (either directly or indirectly).
