USING THIS BOOK xix

I. INTRODUCTION 1
Overview 1

I.A. MEASURING DEVELOPMENT 5
Note I.A.1. The Evolution of Measures of Development 5
Selection I.A.1. Why Are Services Cheaper in the Poor Countries? 13
Comment I.A.1. The Productivity and Factor Proportions Explanations Again 17
Selection I.A.2. Burden of Poverty 18
Comment I.A.2. Capabilities and Entitlements 30

I.B. ECONOMIC PERFORMANCE OF LESS DEVELOPED COUNTRIES: 35
THE RECENT PAST 35
Selection I.B.1. The East Asian Miracle 36
Selection I.B.2. East Asian Crisis: An Overview 42
Selection I.B.3. Completing China’s Move to the Market 48
Selection I.B.5. The Launching of the Reforms 58
Note I.B.1. The Triumph of Laissez-Faire? 64
Selection I.B.7. Explaining Africa’s Development Experiences 65

I.C. THE DISCIPLINE OF DEVELOPMENT ECONOMICS 69
Note I.C.1. Evolution of Development Economics 69
Comment I.C.1. Classical Growth Theory 72
Comment I.C.2. Development Economics as a Special Subject 73
Note I.C.2. New Endogenous Growth Theory 75
## II. HISTORICAL PERSPECTIVE

Overview: The Division of the World

- Selection II.1. The Spread of Economic Growth to the Third World: 1850–1980 80
  - Comment II.1. State-owned Enterprises and Privatization 96
- Selection II.2. The Division of the World and the Factoral Terms of Trade 97
- Note II.1. Why Not Export First? 102
- Note II.2. The Lewis Model of the World Economy 104
- Selection II.3. Agricultural Productivity, Comparative Advantage, and Economic Growth 107
  - Comment II.2. Income Elasticity of Demand for Food in the Matsuyama Model 110
- Selection II.4. Income Distribution, Market Size, and Industrialization 111
  - Comment II.3. Minimum Market Size in the Murphy–Shleifer–Vishny Model 113
- Selection II.5. Divergence, Big Time 114

## III. SAVINGS AND INVESTMENT

Overview: Savings—The Engine of Growth?

- Note III.1. The AK Model 123
- Selection III.1. Is Fixed Investment the Key to Economic Growth? 126
- Selection III.2. Interest Rates in the Organized Money Markets of Underdeveloped Countries and Interest Rates Outside the Organized Money Markets of Underdeveloped Countries 129
- Selection III.3. Financial Liberalization in Retrospect: Interest Rate Policies in LDCs 133
  - Comment III.1. Financial Liberalization 136
- Selection III.5. Financial Development and Economic Growth: Views and Agenda 141
- Selection III.6. Good Policy or Good Luck? Country Growth Performance and Temporary Shocks 147

## IV. INTERNATIONAL TRADE AND TECHNOLOGY TRANSFER

Overview 155

IV.A. TRADE

- Selection IV.A.1. Natural Resource Abundance and Economic Growth 161
- Note IV.A.1. Import-substituting Industrialization and the Infant-Industry Argument 168
- Selection IV.A.2. Typology in Development Theory: Retrospective and Prospects 170
- Selection IV.A.3. An Exposition and Exploration of Krueger’s Trade Model 175
  - Comment IV.A.1. Moving Up the Ladder and Changes in Relative Costs of Factors of Production 178
Selection IV.A.5. Exchange Control, Liberalization, and Economic Development 187
Selection IV.A.6. Trade Policy Reform
   Comment IV.A.2. Stabilization-cum-Liberalization Programs 193
Selection IV.A.7. Getting Interventions Right: How South Korea and Taiwan Grew Rich 195
Note IV.A.2. Tradeability of Intermediate Goods, Linkages, and Bottlenecks 202

IV.B. FOREIGN CONTACT AND TECHNOLOGY TRANSFER 204
   Note IV.B.1. Learning in International Production Networks 204
Selection IV.B.1. Technology Gaps Between Industrial and Developing Countries: Are There Dividends for Latecomers? 206
Selection IV.B.2. The Benefits of FDI 209
Note IV.B.2. Trade as Enemy, Handmaiden, and Engine of Growth 211

V. HUMAN RESOURCES 213
   Overview 213

V.A. EDUCATION 216
   Note V.A.1. Three Views of the Contribution of Education to Economic Growth 216
Selection V.A.2. Economic Impact of Education
   Comment V.A.1. Ability Differences, Spillovers, and the Returns to Education 226
   Comment V.A.2. Education and Development 227
Selection V.A.3. Interpreting Recent Research on Schooling in Developing Countries 229
Selection V.A.4. Schooling Quality in a Cross Section of Countries 234
Selection V.A.5. Creating Human Capital 237

V.B. POPULATION 241
   Note V.B.1. The Size of the World’s Population and the Size of the Average Family 241
Selection VB.1. Economic Approaches to Population Growth 242

V.C. HEALTH AND NUTRITION 249
   Selection V.C.1. Health and Nutrition 254
   Selection V.C.2. Investing in Health 257

V.D. GENDER AND DEVELOPMENT 263
   Selection V.D.1. Women’s Education in Developing Countries: An Overview 263

## VIII. C. CASE STUDIES

Selection VIII.C.1. Economic Growth and Income Distribution in Taiwan, 1953–64
Selection VIII.C.2. Brazilian Size Distribution of Income

## IX. POLITICAL ECONOMY

### IX.A. THE (PROPER) ROLE OF THE STATE IN LESS DEVELOPED COUNTRIES

Selection IX.A.1. Public Policy and the Economics of Development

Comment IX.A.1. Development Planning
Comment IX.A.2. Governing the Market

### IX.B. RENT SEEKING AND GOVERNMENT FAILURE

Note IX.B.1. What Are Rents?

Selection IX.B.1. The Political Economy of the Rent-Seeking Society

Comment IX.B.1. Complete Rent Dissipation Through Competitive Rent Seeking in the Harris–Todaro Model
Comment IX.B.2. The Relationship Between Rent Seeking and Corruption

Selection IX.B.2. Neoclassical Political Economy, the State, and Economic Development

Selection IX.B.3. India

Selection IX.B.4. Governments and Agricultural Markets in Africa

Selection IX.B.5. Africa’s Growth Tragedy: Policies and Ethnic Divisions

### IX.C. STATE CAPACITY

Selection IX.C.2. The State as Problem and Solution: Predation, Embedded Autonomy, and Structural Change

Selection IX.C.3. Taking Trade Policy Seriously: Export Subsidization as a Case Study in Policy Effectiveness

Selection IX.C.4. Bureaucratic Structure and Bureaucratic Performance in Less Developed Countries

## X. DEVELOPMENT AND THE ENVIRONMENT

Overview: Environmental Problems in Less Versus More Developed Countries

Selection X.1. Development and the Environment

Comment X.1. The “Environmental Kuznets Curve”

Selection X.2. North–South Trade and the Global Environment
Comment X.2. Empirical Studies of the Impact of International Trade on the Environment in Less Developed Countries 533

Selection X.3. Deforestation and the Rule of Law in a Cross Section of Countries 535

Selection X.4. Determinants of Pollution Abatement in Developing Countries: Evidence from South and Southeast Asia 544

Selection X.5. Sustainable Development: Ecology and Economic Progress 554

Comment X.3. Weak Sustainability, Genuine Savings, and Green National Accounting 559

| Exhibit IX.A.1. Market Failure and State Intervention| 431 |
The economics of development is one of the most exciting subjects in social science. Why, two centuries after the Industrial Revolution, are poverty and its attendant ills so prevalent in most of the world? And what can be done about it? Nobel Prize-winning economist Robert Lucas wrote of the questions addressed by development economics, “Once one starts to think about them, it is hard to think about anything else” [“On the Mechanics of Economic Development,” Journal of Monetary Economics 22 (July 1988), p. 5].

Development economics is also a very frustrating subject. Unlike most areas within economics, there exists no consensus on what the student should know. Two scholars can with equal justification write two completely different textbooks.

The aim of this book is to convey as much of the excitement of development economics and as little of the frustration as possible. To this end we have avoided writing the ordinary type of textbook, instead culling the most insightful readings from the diffuse field of development and bringing them into conceptual order. By using this distinctive approach we allow for a variety of perspectives while keeping in sight the most important overarching themes. The section “Using This Book” (p. xix) describes our strategy of combining excerpted readings (“Selections”) with our own “Overviews,” “Notes,” “Comments,” and “Exhibits.”

After being responsible for the previous six editions of Leading Issues in Economic Development over the past 35 years, Professor Meier has now selected Professor Rauch to upgrade and modernize this seventh edition and to perpetuate subsequent editions. This edition is mainly Professor Rauch’s effort. It reflects his desire to strengthen the analytical and quantitative dimensions of development economics and to illuminate contemporary—and future—problems of development policymaking. In all, it provides fresh and serious attention to the interplay between development experience, changing views of economists, and policy.

While this seventh edition maintains the format of previous editions, the inclusion of a new author has brought many changes relative to the sixth edition:

- New chapters on income distribution and on development and the environment have been added while other chapters have been consolidated.
- Most of the Selections and Notes are new.
- The representation in the Selections of articles from leading professional journals has increased.
- The Selections make greater use of statistical analysis, and an Appendix, “How to Read a Regression Table,” has been added to ensure that these Selections are easily accessible to all readers.

We wish to express our appreciation to the authors and publishers who have granted permission to use excerpts from publications for which copyrights exist. Specific acknowledgment is given with each Selection. Some parts of the original versions of the excerpted materials have been omitted out of consideration for relevance and to avoid repetition. In some instances, tables and diagrams have been renumbered and the footnotes have been deleted or renumbered.

We would like to thank a number of extremely busy people who generously took time out to provide advice or to comment on portions of the manuscript: Richard Carson, Graham Elliott, Peter Evans, and Dani Rodrik. We would also like to acknowledge the valuable research assistance of Neville Francis, Timothy Kane, Paula Lindsay, and Donald McCubbin. James Rauch wishes to thank his wife, Doris
Bittar, for making room in her life for this book during its final months of preparation. Kenneth MacLeod has been a very helpful and patient editor. Finally, we are grateful to the entire profession of social scientists whose writings on development provide the foundation for this volume.
USING THIS BOOK

Instructors and students can use this book more like a main text or more like a supplementary reader. To facilitate the latter approach the contents have been designed to allow individual freedom of choice in deciding what chapters and Selections to read and in what sequence. If the former approach is taken, the organizational and thematic guidance of the chapter Overviews can be followed and the chapters can be read in numerical order.

The chapters include the following materials:

Overviews: These are introductory essays that show how the subsequent chapter materials fit together and elucidate one or more overarching themes. They sometimes contain ideas that are not explicitly presented by the other chapter materials.

Selections: These are the core of the book. They present a broad sample of the major contributions by scholars and practitioners on the central issues in economic development. Each Selection has been edited for the sake of brevity and to highlight the points of greatest relevance for the chapter in which it appears.

Notes: These serve two purposes. One is to expound important ideas that are extant in the literature but are not presented as clearly or simply as we would like. The other is to present more original material that complements the Selections.

Comments: Like the Notes, these serve two purposes. One is to clarify or expand upon the immediately preceding Selection. The other is to suggest additional readings on the subject of the immediately preceding Selection.

Exhibits: These are tables and charts that provide empirical illustrations and data on topics under discussion. Starting with Selection III.1, some Selections include regression tables. Readers without econometric training are urged to refer to the Appendix to get the most insight from these Selections.
INDEX OF SELECTION AUTHORS

Ahluwalia, Montek S., 387–90
Alesina, Alberto, 401–3, 404–8
Balassa, Bela, 180–86
Banerjee, Biswajit, 323–27
