The Inca civilization flourished in ancient Peru between c. 1400 and 1533 CE, and their empire eventually extended across western South America from Quito in the north to Santiago in the south, making it the largest empire ever seen in the Americas and the largest in the world at that time. Undaunted by the often harsh Andean environment, the Incas conquered people and exploited landscapes in such diverse settings as plains, mountains, deserts, and tropical jungle. The four governors reported to the supreme Inca ruler in Cuzco. To ensure loyalty, the heirs of local rulers were also kept as well-kept prisoners at the Inca capital. Inca civilization left a superb legacy characterized by remarkable Engineering and stone building techniques. Sacsayhuaman fortress-among other shows massive blocks of stone, weighting up to several dozen tons each, that were put together with incredible precision. They have built an amazing system of roads - over 14,000 miles - some of them still in use. Inca emperor Atahualpa was kidnapped and killed after paying a huge ransom, and Pizarro with a group of mercenaries moved to Cuzco in search of more gold and power. What killed the Incas wasn't much warfare in itself, even though they didn't have guns or cannons, but rampant disease that Spaniards brought along.
