Cass Meyer has always thought of herself as an ordinary, unpopular girl. However, she had one best friend whom she loved more than anyone else—Julia. Julia introduces Cass to the drama crowd, and Cass forms friendships with them through her. When Julia is killed in a car accident, Cass’s world is turned upside down. How would she make it without her?

In Julia’s memory, her friends decide to stage a top-secret play that she had been working on. Cass shifts back and forth from her memories of taking Julia’s ashes to California (where they had planned to go together) and the process of preparing the play in honor of their friend. Throughout the story, Cass works through what her true feelings for Julia may have been and what her feelings toward a former enemy are now. This is a story of loss and the importance of friendship.

Natalie O’Reilly was born with a congenital eye disease. At the age of 14, her sight had deteriorated so much that she feared losing her vision. Until this point, she believed that there would be a cure, that she would get better.

At the start of her freshman year, Natalie’s parents send her to the Maryland School for the Blind. They were hoping that she would have time to learn Braille and other ways to survive if she truly did end up losing her sight. One November morning, Natalie awakens to find her sight gone completely. Her world becomes gray. She hasn’t spent enough time at the school to learn ... is faced with deciding how she’s going to react to her new reality. She faces several crises where having her sight wouldn’t help her. Dealing with those crises helps her come to terms with the changes.

The paths of two teens on the run collide on Toronto’s streets. Blink survives on the street partly by dining on the leftovers from room service trays in ritzy hotels. But his breakfast is interrupted when he sees a kidnapping that isn’t really what it’s supposed to be. Through a careless mistake on the part of the culprits, Blink picks up the kidnapped executive’s cell phone. When the media report the kidnapping, Blink realizes that he has valuable information. Phone calls from the man’s daughter persuade Blink that she needs his help, and he agrees, dreaming of a monetary reward. Caution is also on the run, ostensibly from an abusive drug lord, but in reality from her own past, when a fluke accident changes her world completely. The fast-paced storyline forces readers to consider happenstance, fate, and probability, woven subtly but inexorably through the narrative.

Daelyn is a troubled teen who attends a private Catholic girls’ school—her parents’ misguided attempt to salvage her by switching schools. Daelyn cannot speak due to another thwarted suicide attempt, yet she writes her own painful story. This powerful, disturbing novel covers her ongoing efforts to kill herself as she follows the guidelines of Through-the-Light.com.

Daelyn has been victimized by taunting classmates, originally because she was fat. Now thin, she has become a “freak,” harassed and isolated as she has always been. Will she carry out her path of self-destruction despite hopeful alliances with Santana, the boy who battles Hodgkin’s lymphoma, or Emily, a fellow classmate whose size is setting her up for bullying? Peters writes important, challenging fiction for young adults, and this novel’s examination of bullycide offers uncomfortable insights into the world of those who feel like losers from birth and trust no one.

Relationships/Modern Communication

ISBN: 978-1-4424-0366-6

A disgruntled shrew (Annie) and a bored poet-mastermind (Johnson) team up to test the relationships of their friends in 10 errors. Annie convinces her two best friends to tell their devoted boyfriends that they will be out of town for a few weeks and unable to communicate. Meanwhile, Johnson tricks the boys into joining a chat room where they will be welcoming two alluring foreign exchange students to their school (the two girls in Annie's plan). Annie's plot grows more dangerous as the two girls attempt to steal the hearts of the boys, all the while hoping they will be faithful.

Told entirely in chat and blogs, this modern romance is an enjoyable riff on Shakespearean comedy. Love is attacked with barbed words, cynical plotting, beautiful strangers, and staunch disbelief, but still manages triumph. This book would appeal most to students in grades 8 through 10.

Hamlet Kennedy doesn’t just know her Shakespeare, she lives it. Her parents, both Shakespearean scholars, and her genius 7-year-old sister, Desdemona, who will attend the same middle school, all threaten to make this the worst start to a semester ever. It doesn’t help that a secret admirer keeps giving her origami pigs and that her best friend, Tyler, might have a crush on her. In a semester filled with multiple embarrassing episodes, failed attempts to protect her sister from so-called friends who use her for her brain, and surrealist art projects, will Hamlet eventually cheer “Huzzah” or keep throwing Shakespearean insults at her classmates?

Dionne crafts a sweet, often humorous, romance suitable for upper elementary and middle school readers. This novel also features a contemporary twist to Shakespeare’s A Midsummer Night’s Dream.

They Called Themselves the KKK: The Birth of an American Terrorist Group
Susan Campbell Bartoletti

Beginning in 1866 when six disgruntled Southerners began a club in Pulaski, Tennessee, Bartoletti traces the origins and rituals of the Ku Klux Klan. She carefully details the political climate in the post-Civil War South that laid the foundations for this vigilante group and explains how it evolved and grew. Bartoletti traces the Klansmen’s ideas and explains how they were influenced by seven decades of the war, as well as primary sources, Congressional records, and archival newspaper and magazine accounts. Bartoletti describes how members used secrecy and superstition to intimidate their victims. Back matter includes a Civil Rights Timeline and source notes. The abundant use of photographs and illustrations gives a sense of reality to a story that seems almost fantastical at points.

Reviews can consider books, articles, entire genres or fields of literature, architecture, art, fashion, restaurants, policies, exhibitions, performances, and many other forms. This handout will focus on book reviews. For a similar assignment, see our handout on literature reviews. Above all, a review makes an argument. The most important element of a review is that it is a commentary, not merely a summary. It allows you to enter into dialogue and discussion with the work’s creator and with other audiences.
