Table VI-8: Physical and Speech Therapist Hours per Patient Day, 2015 ....................... 162

Table VI-9: Staffing Hours per Patient Day by Class of Ownership – Total U. S., 2015 ... 164

How to Buy this Book ........................................................................................................ 165
Statistical Yearbook of Norway presents the main tables and figures from official statistics. It also contains a number of historical tables that go back to the 19th century, especially the 2000 edition. The Statistical Yearbook was published in Norwegian and French until 1952, thereafter it was published in Norwegian and English, and in separate Norwegian and English editions after 1996. The publication was discontinued in 2013. The Statistical Yearbook of Norway 2013 contains statistics on Norway and key figures for the Nordic countries and other countries. The yearbook presents the main trends in official statistics in most areas of society. The list of tables and figures and an index at the back of the book provide easy access to relevant information.
