In 1996 Koza started the annual Genetic Programming conference[12] which was followed in 1998 by the annual EuroGP conference[13], and the first book[14] in a GP series edited by Koza. 1998 also saw the first GP textbook[15]. GP continued to flourish, leading to the first specialist GP journal[16] and three years later (2003) the annual Genetic Programming Theory and Practice (GPTP) workshop was established by Rick Riolo[17][18]. Genetic Programming papers continue to be published at a diversity of conferences and associated journals.Â Proceedings of the 14th annual conference companion on Genetic and evolutionary computation.
