The Japanese educational system, due to American occupation after the World War II, was heavily influenced by American educational system. The Fundamental Law of Education in Japan was introduced in 1947, changing the educational system to the 6+3+3+4 structure. The current system includes six years of elementary school, three years of Lower secondary school, three years of upper secondary school and, finally, four years of higher education. The last step is not optional and was created for those who are in the academic stream. It is worth to mention that Japanese educational system is known for Japanese Educational Achievements. Japan's greatest educational achievement is the high-quality basic education most young people receive by the time they complete high school. Although scores have slightly declined in recent years, Japanese students consistently rank among world leaders in international mathematics tests. And education is compulsory through the ninth grade. Municipalities and private sources fund kindergartens, but national, prefectural, and local governments pay almost equal shares of educational costs for students in grades one through nine. Almost 90 percent of students attend public schools through the ninth grade, but over 29 percent of students go to private high schools.
