Testing Tornado

By : J David Eagles AFC
It was early Cold War days when 17-year-old David Eagles applied to the Fleet Air Arm hoping to be a fighter pilot for his national service. He little imagined the career that would follow. After flying training with the US Navy and Australian Fleet Air Arm, he settled into Fleet Air Arm fighter pilot life. He progressed through Naval Test Pilot duties – where he was forced to eject from a Buccaneer during catapult launch trials – before joining British Aerospace and playing a major part in the cockpit design and flight-testing of the RAF’s first fly-by-wire and swing-wing aircraft, the Panavia Tornado. His other experiences include ditching a Firefly into the sea and the near loss of the first British Tornado prototype after a bird strike. Finally, after 6,000 flying hours in sixty different types of aircraft, Eagles finished his career by making the first flight of the EAP, the technology demonstrator for the new Eurofighter Typhoon. Vividly illustrated with photographs, documents and plans, this is a fascinating memoir of naval-flying and test-flying some of the world’s most iconic fighters.

Porsche 911

By : Brian Long
The fifth in a series of books which chronicle in definitive depth the history of the evergreen 911, from the earliest design studies to the water-cooled cars of today. This volume looks at each 911 model and its derivative, taking in the various specials and competition cars along the way.

2010, including the last of the air-cooled 911s, the water-cooled 911s, Cayenne, Cayman, Boxster, and Panamera.

**The Immortal Beaver**

By: **Sean Rossiter**

Developed soon after World War II, the de Havilland Beaver has become one of the most successful and long-lived designs in aviation history. The Beaver was conceived as a "half-ton flying pickup truck" capable of setting down on land, water, and snow. Since its conception the Beaver has been adopted worldwide, becoming the floatplane of choice for island-hopping along the Pacific Northwest, flying into the Arctic, transporting missionaries and doctors into remote spots in Africa, and serving as a support aircraft in Antarctic expeditions. The Beaver also became "the generals' Jeep" during the Korean War and the generals' favorite transport to fishing spots in peacetime.
