Autobiography is one type of biography, which tells a life story of its author, meaning it is a written record of the author’s life. Rather than being written by somebody else, an autobiography comes through the person’s own pen, in his own words. Some autobiographies are written in the form of a fictional tale; as novels or stories that closely mirror events from the author’s real life. In an autobiography, the author attempts to capture important elements of his life. He not only deals with his career, and growth as a person, he also uses emotions and facts related to family life, relationships, education, travels, sexuality, and any types of inner struggles. A memoir is a record of memories, and particular events that have taken place in the author’s life.
