The basic definition of falconry is the use of birds of prey to fly after quarry. Or to put it another way, all falcons are hawks, whereas all hawks are not falcons.
Falcons (Falco) are birds of prey in the genus Falco, which includes about 40 species. Falcons are widely distributed on all continents of the world except Antarctica, though closely related raptors did occur there in the Eocene. Adult falcons have thin, tapered wings, which enable them to fly at high speed and change direction rapidly. Fledgling falcons, in their first year of flying, have longer flight feathers, which make their configuration more like that of a general-purpose
