Writing some thirty years ago, in her classic study on Cities and the Wealth of. Britain's core industries, especially the production of textiles, metalwork and
How has British industry financed itself in the past? With the current debate on industry's financial strategy, this study of the past sixty years is a particularly timely contribution to the discussions on the future financing of industry. This book gives, for the inter-war years, a detailed examination of the main sources of funds, covering long-term and short-term funding. It also traces the transition in the new issue market and explores the course of firms' own internal funds, and ends his coverage of the pre-war years with a chapter on the Macmillan Gap. Its central concern is the question of why economic growth in Britain since the war has been slower than in other countries. This book was first published in 1971.

The industrial Revolution has shaped the societies we live in today and more so in Britain and in Southern Africa. It brought about not only changes in technology, but also changes in the social structures of societies, manufacturing, transport and agriculture. This lesson will focus on the changes that occurred during the Industrial Revolution in Britain, and the beginning of the Industrial revolution in Southern Africa which took place due to the discovery of diamonds and the mining thereof, as well as the increasing interest of Britain in Southern Africa.
