Steam To Silver: A History Of London Transport Surface Rolling Stock

James Graeme Bruce

The history of London Underground's rolling stock is as complex as the history of the network itself. A wide variety of types have been operated, from the early days of steam locomotives and carriages through to today's electric multiple units. The different types used are listed here. Note: Stock shown in red has been withdrawn from traffic. Steam locomotives â€“ withdrawn by 1971. Electric locomotives â€“ withdrawn from passenger service by 1962. Diesel locomotives â€“ DL81-DL83 â€“ withdrawn from service.
