Double exposure photography has come a long way over the years. Here we take a look at 8 photographers who employ double exposure techniques to their work. Learn more about double exposure photography by taking a digital photography workshop at the New York Film Academy today! Workshops are held in New York, Los Angeles & South Beach. Nowadays, some higher end digital cameras can create beautiful double exposures right in the camera, with an LCD screen that shows you the result as soon as you take it.

The stereographic projection was known to Hipparchus, Ptolemy and probably earlier to the Egyptians. It was originally known as the planisphere projection. Planisphaerium by Ptolemy is the oldest surviving document that describes it. One of its most important uses was the representation of celestial charts. The term planisphere is still used to refer to such charts. (1963), Representations of the Rotation and Lorentz Groups and their Applications, New York: Pergamon Press. Do Carmo; Manfredo P. (1976). Differential geometry of curves and surfaces. Englewood Cliffs, New Jersey: Prentice Hall. ISBN 0-13-212589-7. Elkins, James (1988). Location of Monmouth County in New Jersey. List of the National Register of Historic Places listings in Monmouth County, New Jersey. While National Register listings are mostly symbolic, their recognition of significance provides some financial incentive to owners of listed properties, protection of the property is not guaranteed. During the nomination process, the property is evaluated in terms of the four criteria for inclusion on the National Register of Historic Places, the application of those criteria has been the subject of criticism by academics of history and preservation, as well as the public and politicians. List of the National Register of Historic Places listings in Mercer County, New Jersey. This is intended to be a list of the National Register of Historic Places listings in Mercer County, New Jersey. Image: Hamilton Twp NJ Roebling Park View.
