The Book Becomes: The Making Of A Fine Edition

Sebastian Carter

Flanders uses books well and pictures intelligently, searching images for hidden meaning; this book has charm and learning.

"The heart of Ms. Flanders’s book traces the physical alteration of houses over the past five centuries; a useful synthesis for those interested in architectural history and material culture."

"When did houses evolve into homes? The Making of Home is a fascinating and ambitious exploration into the soul of family life. We are more than what we eat, we are also how we live."
